FRUIT TREE DEPARTMENT

INFORMATION FOR PURCHASERS

PACKING CHARGES: We charge for same only to cover the cost of material used.

PRICES: All prices quoted in this list are for stock at Fresno. Freights and express charges are to be paid by purchasers.

SUBSTITUTIONS: Unless advised to the contrary, we will make substitutions where necessary to fill orders complete.

ERRORS: Errors or complaints must be reported within ten days of receipt of goods.

BASIS OF THE SIZES AND CALIPER MEASUREMENTS FOR TREES

On all deciduous fruit trees, except Almonds and Figs, the caliper and height combined determine the grade of the tree.

Not less than 1 inch represents 8 to 10 ft. trees.

Not less than $\frac{3}{4}$ inch represents 6 to 8 ft. trees.

Not less than $\frac{1}{2}$ inch represents 4 to 6 ft. trees.

Not less than $\frac{3}{8}$ inch represents 3 to 4 ft. trees.

Not less than $\frac{1}{4}$ inch represents 2 to 3 ft. trees.

Almonds and Figs are inclined to grow stocky, and the caliper measurements will govern the grade regardless of the height of the tree.

ALMONDS

Not less than $\frac{1}{2}$ inch represents 4 to 6 ft. trees.

Not less than $\frac{3}{8}$ inch represents 3 to 4 ft. trees.

Not less than $\frac{1}{4}$ inch represents 2 to 3 ft. trees.

FIGS

Not less than $\frac{5}{8}$ inch represents 4 to 6 ft. trees.

Not less than $\frac{1}{2}$ inch represents 3 to 4 ft. trees.

Not less than $\frac{3}{8}$ inch represents 2 to 3 ft. trees.

Stocks mentioned in this list will be furnished as follows: 5 of a variety at the 10 rate; 50 at the 100 rate; 300 at the 1000 rate.

7.25
3.50
3.75

DECIDUOUS FRUITS

We exercise great care to have all nursery stock true to name, nevertheless it is understood that should any stock prove otherwise, we shall not be liable for any sum greater than that paid us for only such stock as shall prove untrue.

PEAR BUDDED ON QUINCE ROOTS

"Double-worked" on Beurre Hardy Pear

The Beurre Hardy Pear is used for budding on the Quince because of its great affinity for this stock. Many other varieties of Pear will not take on the Quince; we therefore bud the Beurre Hardy first on the Quince stock and then in turn bud the various varieties listed below on the Beurre Hardy.

	Each	10	100	1000

APEX PLUMCOT

(Freestone)

This new fruit ripens with the earliest plums. Tree a strong, compact, upright grower and good bearer even where apricots cannot be grown, and in seasons when some plums are failures. Fruit very large; color deep pink or light crimson, freestone; flesh honey-yellow, firm, rich, aromatic. A valuable market variety. June.

NEW NECTARINE—GOWER
One Year

Earliest of all Nectarines. Ripens with Early Crawford Peach. No fruit of its class has met with such favor as has this new early Nectarine. We consider that we are very fortunate in being able to introduce this valuable new sort, and strongly recommend it for home and commercial planting. Fruit is very firm free-stone. Ships like a clingstone peach. Very early; delicious flavor. Free, strong grower, bears heavy.

ZANTE CURRANT

Bunches medium; berries small, seedless; skin thin; black; blue bloom. This is the variety producing the currant of commerce, under the name "Zante Currant," of which there are imported into the U. S. annually from Greece over 1,000,000 pounds.

This offers a great opportunity for the planters of the interior valleys where this variety has been thoroughly tested and found adapted to our conditions. August.
